15. (Currently Amended) A surface loudspeaker array comprising a plurality of vertically-splayable speaker racks that are connected together vertically in a serial manner, each said vertically-splayable speaker racks comprises a plurality of planar magnetic transducers or flat panel speakers. A surface loudspeaker array as recited in claim 2, wherein at least one of said vertically-splayable speaker racks comprises a rib, a baffle secured to said rib, and a plurality of planar magnetic transducers or flat panel speakers secured to said baffle.
16. (Original) A surface loudspeaker array as recited in claim 15, wherein insulating material is interposed between said rib and said baffle.
17. (Original) A surface loudspeaker array as recited in claim 15, wherein insulating material is interposed between said baffle and said planar magnetic transducers or flat panel speakers.
18. (Original) A surface loudspeaker array as recited in claim 15, wherein said rib comprises a plurality of end members, said end members being adapted to allow vertical splaying of said vertically-splayable speaker racks.
